

CONSORTIUM

20 organizations in ten European countries.
 8 third parties to support consultation and mobilisation phases.

THE PROJECT

Methodology

PORTUGUESE CONSULTATIONS

CITIZENS AND YOUTH - CONSULTATIONS

- 2 sessions in May 2013
- **Duration:** 1 day
- **Addressed to:** young citizens between 18 and 28 years old, with or without connections to the sea.
- **Participants selection:** widespread dissemination of invitations, and 2683 direct invitations for application; goal 20-25 participants in the room.

Performed exercises :

- ❖ Identification and categorization of ideas: "What contributions bring to our daily lives the sea and oceans for the categories Food, Energy, Place to live, human health, Transport and Tourism and recreation?"
- ❖ Identification of options: "How can the sea and its resources to improve our daily lives even more?"

STAKEHOLDERS - ENGAGEMENT DINNER

Two dinners debate took place in October 2013 and each counted with more than 40 personalities of transportation and leisure and tourism maritime sectors. This events were an extra to the methodology with the goal to assure the participation of high level stakeholders.

STAKEHOLDERS - CONSULTATIONS

- 1 session for each Maritime sector (Transports, and Leisure and Tourism) running in parallel, in November 2013
- **Duration:** 1,5 day
- **Addressed to:** scientists, economic agents, politicians, environmental organizations and civil society.
- **Participants selection:** identification of stakeholders and their typology in each sector - direct and indirectly involved on the sector (surveyed carried out with FEEM-Fórum Empresarial da Economia do Mar) collaboration); goal 15-20 participants (entities) in the room.
- **Performed exercises :**
 - ❖ Identification; Categorization and Structuring of barriers: "In this sector which the main barriers to a sustainable use of the sea?"
 - ❖ Identification of solutions: "What are the solutions to overcome the barriers in this sector?"

Results

CITIZENS AND YOUTH

First Session

Most voted **IDEA**

Marine biodiversity represents a vast and repertoire of organisms for pharmacological development

Most voted **OPTION**

Investing in research of wave and tidal energies to take advantage of our seas

Second Session

Most voted **IDEA**

The ocean is important for scientific research

Most voted **OPTION**

Raise awareness of the potential and maintenance of marine ecosystems near the population (schools, companies...)

Leisure and Tourism

Lack of national strategy for the external promotion of the recreational boating

Transports

National strategy for the sea without a long term vision

Integrate sports and water activities and contents in schools *curricula* i.e. history, shipbuilding, learn how to swim, security and knowledge about the sea, meteorology, environment...

There was not a most voted solution. Solutions can be found in the report.
